

Advantages:

- ▶ Complete parking application with full records of all vehicles
 - ▶ Option to E-mail the parking tickets
 - ▶ Management can monitor and assess the turnover of the vehicles
 - ▶ Reporting system (Daily, Weekly and Monthly)
 - ▶ High security with User login details
 - ▶ Application can be customized as per the desired pattern of parking
 - ▶ Seamlessly integrated with third party applications
- Shopping malls
 - Bus Stands
 - Metro Stations
 - Railway Stations
 - Hospitals
 - Airports

Features :

1. System shall determines the exit vehicle ticket if customer re-produces previous days tickets.
2. Round up more than 15 mins to 1 hour. (Example Time is 4 hr 20 mins system treats 5 hrs, and 4 hr 10 mins treats as 4 hrs only).
3. Calculates GST value with 18% on Parking Amount.
4. Prints serial # no, Entry Date and Time besides that it operates manually.
5. On monthly Pass- Issue Date and Expiry Date and vehicle type to avoid misuse of Pass (for eg. like 2 wheeler pass to 4 wheeler vehicle)
6. System restricts multiple entries of vehicles by using single pass on a single day without exit.
7. Monthly pass can be used for any vehicle of same vehicle type.
8. While monthly pass holder is entering, if we record vehicle number, at exit time to compare the vehicle's number, application is displaying the vehicle number.
9. Checking validity of monthly pass while entering and exiting
10. At exit time if pass expires, receipt can be generated for the duration from expiry time to exit time. Hassle free exit by transforming ticket number into barcode.
11. Reprinting of current entry ticket and exit ticket also provided
(if we get any printing problem like no paper)
